

PROJECT MANAGEMENT DYNAMICS

The Systemic Solution for Producing Quality Project Deliverables and Delighting Customers Without Schedule Slippages, Cost Overruns, or Employee Burnout

March 20 - 22, 2018
University of Dallas, Irving, Texas

OVERVIEW

ConfluCore® and the University of Dallas proudly present a game-changing approach for the project leaders, based on the principles of *BUSINESS DYNAMICS*, pioneered at the **MIT Sloan School of Management**.

This 3 day training will help you discover the many interacting, and often intangible project elements that *COUNTER-INTUITIVELY* affect critical outcomes, but are *NOT* covered in the classical project management theory.

Learn this novel methodology, employed by BOEING, FLUOR, GE, TOYOTA, and other world-class organizations, and take your project success to a whole new level.

LEARN HOW TO

- ◆ Uncover and harness the **INVISIBLE ELEMENTS** of projects that subtly but adversely impact your project costs, schedules, and deliverables. Know when and where to make changes.
- ◆ Develop a **DYNAMIC PROJECT MODEL** and **SIMULATE** scenarios to perform a **RICHER** set of what-if analyses that are often overlooked or simply not available using the traditional PM methodologies.
- ◆ Obtain **DEEP INSIGHTS** into the complexities of the “**PROJECT SYSTEM**” that leaders often grapple with, and dramatically improve the performance of your projects.
- ◆ Gain **GREATER CONFIDENCE** in making strategic project decisions, and a **SUPERIOR CLARITY** for predicting their consequences.
- ◆ Enhance your “**SYSTEMS THINKING**” and extend its application to related organizational functions.

Registration Deadline: March 2, 2018

www.conflucore.com/pmd/register

Participants will receive a University of Dallas certificate upon completing this training

TUITION: \$3,895

\$395 discount applies if registered and payment made by January 31, 2018
